(Java, C++, C#)

Compile language

all code .java → compile → .jar → execute → output

Interpret language (Python, JS)

all code .js → interpret / execute → output

Interactive & Dynamic

Programming language
- C
- C++
- C#
- Java
- Python
- Javascript → only proglang. for Web

Javascript → makes website interactive

Scripting level language

Brendan in 1995

- single threaded
- interpret
- synchronous → execution one

ES
- Ecmascript

Where to use?
- Website app
- Mobile app
- Soft-ware, Desktop app

NodeJS → Develop Backend
- 2009

JS
1. Prog. fundamentals
   - Datatypes
   - Variables
   - operators
   - conditional statements
   - loops
   - functions
2. DOM manipulation
3. Async Prog. → M2

Variables

(wax) A — Sugar

B — Salt (crystal) powder (type)

Tea - A

Maggi - B

To run JS
1. Link JS with html
2. Install NodeJS and run

Datatypes

Primitive (passed by value)
- string
- number 20.94 20
- Booleans T or F
- null → object
- undefined

Non-Primitive (passed by reference)
- object
- Arrays → object
- functions
